### **Alexander von Humboldt Foundation (AvH)**

The AvH enables highly-qualified foreign doctorates/PhD holders to come to Germany to complete a long-term research project.

The web site describes all the programs offered by the AvH in detail and provides downloadable application forms. The latest news on the work of the AvH can be found in the new online magazine "Humboldt Kosmos". The detailed "Practical hints for your stay in Germany" for visiting scientists is also new, offering plenty of tips, for example, on finding a place to live, buying a car and other everyday problems. The guide can be found in the "Fellowships and Awards" section under the heading "Support in Germany".
